- Self-Motivated
- Organized

Projects

Beer Me

<https://github.com/blueink38/beer-me> | <https://hey-beer-me.herokuapp.com/>

- Group project. MERN stack application that utilizes 3rd party APIs to allow users to search for Breweries by city, state, keyword, and even by the users' location. Users can get directions using the Tom-Tom API, and save Breweries that they would like to visit later.
- Individual role was to create API fetches for third-party APIs, as well as create the React component that allows users the ability to decide how they want to search. Also, set up indexDB to save data locally. Created card components and stylized brewery cards on the front-end.
- MERN, GraphQL, Semantic-UI React, EmailJS

Eat Out, Austin

<https://github.com/DragoonKite/eat-out-austin> | <https://eat-out-austin.herokuapp.com/>

- Group project. A full-stack application that allows industry insiders of the Austin local food scene to offer their reviews and recommendations of restaurants for visitors and newcomers to eat.
- Individual role was to create API routes for the databases using SQL and Sequelize. Created Javascript code to allow front-end developers to pull from the database to display on the application and assisted with making sure handlebar files were as efficient as possible.
- HTML, CSS, JavaScript, Bootstrap, Node.JS, Sequelize, Express.JS, Express
- Handlebars, Custom API's
-

Safe Travels

<https://github.com/cocobeware83/Safe-Travels> | <https://cocobeware83.github.io/Safe-Travels/>

- Group project. The team developed an application that allows the user to pull pertinent information to a US city before deciding to travel to that location.
- Individual role was to research CSS frameworks to incorporate into the project, help set up HTML body, and develop and maintain Javascript code.
- HTML, CSS, JavaScript, jQuery, MomentJS, Bulma CSS Framework, API's

Experience

Lead Computer Coding Instructor (Part-Time) CodeStream Studios

2021-Present
Denton, TX

- Led class of 20 high school students in a virtual classroom setting
- Taught students fundamental programming languages and best practices
 - (HTML, CSS, Javascript)
